

## Shafer's Classic Reproductions DBB401 - 65-68 Caliper Bracket Kit

### Passenger Side

2-1/4" bolt - goes through that bracket using a 3/4" spacer between that bracket and the small bracket. Bolt threads into small bracket. Use lock washer and locking nut on that to lock in place.

Caliper mounting hole

This bolt and washer goes through the bracket into the spindle hole where the wheel cylinder bolted on.

Caliper mounting hole

Mount this small bracket first. Use two 3" long bolts. Front bolt goes through the spindle and through the steering arm. Use lock washer and locking nut on that bolt.

1/2" spacer - that goes in the rear bolt between the steering arm and the bracket. Use lock washer and locking nut on that bolt.
